INDEX TO VOLUME IV.

GENERAL ALPHABETICAL INDEX.

*Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the Analysis of Current Electrochemical United States Patents by A. (Analysis); from the Digest of Electrochemical United States Patents Prior to July, 1902, by D. (Digest); from Recent Metallurgical Patents by M. (Metallurgy). Illustrated articles are indicated by *.*

The regular departments are found on the following pages:

Synopsis of Periodical Literature, 25, 70, 107, 148, 188, 241, 277, 327, 363, 410, 455, 495.

Analysis of Current Electrochemical Patents, 30, 65, 112, 151, 191, 237, 275, 319, 369, 415, 464, 502.

Digest of United States Patents Prior to July, 1902, 42, 80, 120, 162, 204, 252, 290, 338, 376, 423, 468, 514.

Recent Metallurgical Patents, 33, 74, 113, 153, 193, 242, 281, 324, 371, 418, 460, 501.

Notes on Electrochemistry and Metallurgy in Great Britain, 21, 62, 105, 146, 186, 235, 271, 318, 360, 408, 453, 507.

Iron and Steel Market Reports, 294, 342, 380, 428, 472.

The serial of J. W. Richards on Metallurgical Calculations is found on the following pages: 11, 55, 99, 129, 180, 231, 259, 303, 358, 383, 446, 486.

A

ABBE Engineering Co. . . . *333, 363, 512
Abner-Doble Co. . . . 118
Accumulators. (See Storage Battery). . . .
Acetylene. Atkins dry process. . . . 148
——dissolved in acetone. (S.). . . . 107
——History. (S.). . . . 27
——(See also Welding, Oxyacetylene flame.)
Acheson Siloxicon Articles Co. . . . 40
Acid pickles. Effect on steel. . . . *7
Acker Process Co. . . . 5
Air. Regenerated by sodium peroxide. . . . 166, *226
——by potassium-sodium peroxide. . . . 250
Alcohol. Free. . . . 467
Alcohols, aromatic and their ethers. Mettler. (A.). . . . 192
——Aiken. (A.). . . . 192
Aldehydes. Production of. Lang. (A.). . . . 68
Alkali. Future of Leblanc and electrolytic alkali works in Europe. Kershaw. . . . 173
Allis-Chalmers Co. . . . 41, 79, *117, 119, *158, 160, 198, 251, 337, *373, 375, 423, 512
Alloy for electric resistance. Driver. (M.). . . . 281
Alloys Research Committee. . . . 23
Alloys. (See the different metals; also bronze; also Furnace. Electric. Manufacture of. Ferro-alloys.)
ALUMINIUM:
——process and industry. Richards. . . . 88
—— Chandler. . . . 433
——Expiration of Hall patents. . . . 163
——Statistics. . . . 514
——in Europe. . . . 376
——production in Europe. (S.). . . . 27
——Autogenous welding. Schoop. . . . 338
——Soldering. King. (M.). . . . 114
——Melting Points of cryolite-alumina mixtures. Pyne. . . . 435
——electrolytic valve. Buettner. (A.). . . . 69
——alloys with magnesium and silver alloys. (S.) 73
——magnesium alloys. Lougouinine and Schukareff. (S.). . . . 191
——carbide as reducing agent of oxides. (S.). . . . 27
American Blower Co. . . . 203
American Chemical Society. . . . 467
American Electrochemical Society. . . . 128, 150, 202, 205, *211, 282, 422, 432, *433, 467, 474
——Cornell meeting. Report. . . . 205, *211
——New York meeting. Report. . . . *433
American Foundrymen's Association. . . . 250, 288, 303, 332
American Institute of Electrical Engineers. . . . 208
American Institute of Mining Engineers. Bethlehem meeting. . . . *87
——London meeting. . . . *349, 362
American Instrument Co. . . . 337
American Mining Congress. Denver meeting. . . . 428
American Society for Testing Materials. . . . 204
Ammeter. Portable. . . . *337
Ammonia by electrolysis. Lyons and Broadwell. (A.). . . . 192, *239
——and caustic from air by discharges and electrolysis. Cassel. (A.). . . . 417
Ammonium. Coehn. . . . 317
Anaconda Copper Mining Co. Washoe plant. (S.). . . . 328
ANALYSIS:
——Carbon and sulphur in iron. . . . 303
——carbon in ferrochrome. Offerhaus. . . . *59
——cadmium. Flora. (S.). . . . 71
——copper slag. Low. . . . 47, 86
—— Smith. . . . 48
—— Rueger. . . . 86
——Gold. Withrop. (S.). . . . 495
——sugar by electro-decolorization. Wiechmann 400
——Zinc with rotating electrodes. Price and Judge. . . . 275
——Rotating Cathode. Perkin. . . . 275
——Switchboard for electrolytic. Larison. (S.) 495
Anthracene oxidised by electrolysis. Oppermann. (A.). . . . 323
Anthraquinone by electrolysis. Oppermann. (A.) 323
Antimony. Explosive. . . . 24
——nickel alloys. (S.). . . . 280
Aromatic alcohols. Mettler. (A.). . . . 192
——Aiken. (A.). . . . 192
Arsenic-copper compounds. (S.). . . . 108
——lead alloys. Friedrich. (S.). . . . 190
——silver alloys. (S.). . . . 242
Askroft, Hugh A. . . . 80, 251
Assay of auriferous tin-stone. Bannister. . . . 236
Atomic weights. Fixing. Thomson. (S.). . . . 241
——and number of electrons. . . . 255
Automatic Refrigerating Co. . . . 159

B

BACKUS Water Motor Co. . . . 513
Baker, J. T., Chemical Co. . . . 375
Ball filling for acid towers. . . . 466
Bancroft, W. D., Portrait. . . . *222
Barium hydroxide from sulphide. Brochet and Ranson. (A.). . . . 504
Batteries. (See Storage Battery, Primary Battery, Standard Cell, Gas Cell, Dry Cell, Carbon Cell.)
Bausch & Lomb Optical Co. . . . 203
Bauxite as refractory. . . . 43, 52
——brick for cement kilns. . . . 466
Bertuch, F., & Co. . . . *157, 466
Bessemer converter. (See Converter.)
Bethlehem Steel Co. . . . 118
Bismuth. Atomic weight. . . . 24
Blackwell, Geo. G., Sons & Co. . . . 247, 467
Blast. (See also Furnace, Metallurgical and Iron Dry-blast.)
Blast Furnace. (See Furnace. Metallurgical Blast furnace.)
Bleach. Future of Leblanc and electrolytic alkali works in Europe. Kershaw. . . . 173
——(See Sodium chloride. Electrolysis.)
Bleaching. (See Sodium chloride. Electrolysis. Hypochlorites; also Discharges. Electric. Ozone.)
Blowing Engines. . . . *158
Blowpipes. (See Welding.)
Bogue, Chas. J., Electric. Co. . . . 289
BOOK REVIEWS:
